BY

MyVenice
LUXURY EXPERIENCE

A new way of experiencing design. **Between creativity and modernity.**
A conscious design, **attentive to the future**, capable of offering a vision of modern
and refined furnishings, which combines elegance and refinement.

Inspired by **the gifts of nature**, all our products enhance the natural beauty of the
material used, by virtue of the charm and exclusivity of the corrugated cardboard
texture. The end result is a product that conveys **a feeling of authentic relaxation**,
thanks to the sinuous lines and natural colors.

Sustainability is the value that best reflects our image. Responding to this need,
we carefully selected the raw materials and studied the design to obtain
a **unique and innovative** final result.
